AESOP4FOOD: Action for Education, Spatial Organisation and Planning for Sustainable Food

A Transdisciplinary and Participatory Approach to food system resilience

Sustainable food planning is a thriving transdisciplinary research and policy field bringing together policymakers, academics, community workers, NGOs, and practitioners across the globe.

Starting from the evidence of serious gaps in knowledge and transformative competences to address the challenges in a multi-disciplinary way and the recognition of the essential role of graduates of (spatial) planning course in developing integrated territorial plans in a democratic way, and understanding an inter-sectoral, multi-level, and multi-stakeholder approach, the **AESOP4FOOD Erasmus+ project** aims to answer the ***need for sustainable food planning*** by creating a joint interdisciplinary European learning activity.

We propose an **online open course on sustainable food planning** (5 ECTS for active participation with the assignments) for students of planning disciplines, agronomy, environmental sciences, and related subjects. The seminar consists of *virtual classroom sessions with peers/experts, self study* and teamwork on case studies with international fellow students.

The course relates to *food governance* (food councils) and *policies, land management, agroecological urbanism, agroecology, agronomy, the economics of food, food systems and chains, local food networks, foodscapes, metropolitan food planning, food waste, food communities and participation, food justice and security* and fosters transdisciplinary collaboration and transformative science.

It will take place in **the spring of 2022**, running from **March 24, 2022 until the end of June**, almost every **Thursday at 17-18.30 CET**. Sometimes the seminar takes place on Wednesdays afternoon because of festive days in partner countries.

Registration starting *January until March 15, 2022*: <https://landscape.limequery.com/395866?lang=en>

COURSE SCHEDULE		March 24 - June 30, 2022	Thursday or Wednesday / 17:00 to 18:30 CET	
PHASE 1	Exploring the field of play	PHASE 2	Analysing your local foodscape	PHASE 3
Student presentation	Assignment	Student presentation	Assignment	Collaborative goals and vision
1	2	3	4	5
24.03	31.03	07.04	21.04	28.04
Thursday	Thursday	Thursday	Thursday	Thursday
PHASE 4	Strategy and interventions	PHASE 5	Evaluation & monitoring	Student FINAL PRESENTATION
Student presentation	Assignment	Student presentation	Assignment	Student FINAL PRESENTATION
6	7	8	9	10
12.05	19.05	25.05	01.06	08.06
Thursday	Thursday	Wednesday	Wednesday	Wednesday
11	12	13	14	15
23.06	30.06	07.07	14.07	21.07
Thursday	Thursday	Thursday	Thursday	Thursday
